

## Veterans Home - Chippewa Falls

COVID + Family Updates 12.23.2020

Dear Family and Friends:

### COVID-19 Updates:

Since our last update, we have learned that one member has tested COVID-positive. This means we currently have 2 active cases.

Here is our current information:

<b>Current Active COVID-19 Confirmed Positive:</b>	2 (One member, One employee)
<b>Current Active COVID-19 Suspected:</b>	0
<b>Cumulative COVID-19 Confirmed Positive:</b>	33 (Four members, Three contracted individuals, Twenty-Six employees)
<b>Cumulative COVID-19 Suspected Positive:</b>	2 (One member, One employee)
<b>Total Recovered Individuals:</b>	32 (Three members, Three contracted individuals, Twenty-Six employees)

Our COVID-19 Infection Prevention and Response Action Plan follows guidance from local, state, and federal health officials. It ensures we're doing everything possible to protect those who live and work in the Veterans Home. See below for the full plan.

As a reminder, testing for all members and staff for COVID-19 continues twice per week. We plan to conduct additional testing to quickly be able to isolate any positive cases to ensure safety for all. In addition, you can currently conduct closed window and virtual visits to stay connected with your loved ones.

### Questions:

If you have any questions, contact Katie Plendl at 715-720-6775 or [Veterans.Home-CF@dva.wi.gov](mailto:Veterans.Home-CF@dva.wi.gov).

Sincerely,  
Megan Corcoran

### Veterans Home COVID-19 Infection Prevention and Response Action Plan

First and foremost, our priority is to keep everyone safe and healthy. We are in close contact with our medical director, WDVA, other providers, and state and local health officials to ensure we are taking all appropriate steps at this time. We are following guidance from the Centers for Disease Control and Prevention (CDC), Centers for Medicare & Medicaid Services (CMS), and state and local health officials to protect our members and staff from this virus, and are taking every action possible to prevent it from spreading in our care community.

The following is a summary of our COVID-19 Infection Prevention and Response Action Plan.

- Utilizing appropriate personal protective equipment (PPE), as directed by CMS guidelines. Staff continues to wear PPE, including masks, eye protection, gloves, and gowns depending on the

community's COVID-19 status. Members are asked to wear a face covering when interfacing with others or when out of their rooms.

- Screening and monitoring members and staff for symptoms. We have increased our screening and monitoring of members and staff for COVID-19 symptoms. COVID-19 symptoms include fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, or diarrhea.

We all play a part in keeping ourselves and others healthy. Please wash your hands often, avoid touching your face, cover your coughs and sneezes with a tissue, wear a mask or face covering, and practice social distancing.

We continue to educate members and staff on COVID-19. For additional information, please visit the CDC's website at [www.cdc.gov/coronavirus/2019-ncov/index.html](https://www.cdc.gov/coronavirus/2019-ncov/index.html) or the Wisconsin Department of Health's website at [www.dhs.wisconsin.gov](https://www.dhs.wisconsin.gov).

- Tracing individuals who come in contact with anyone affected. The community will work with the tracing staff from state and local health departments to assess all who may have come in close contact with an affected individual. We will continue to follow all requirements in implementing the next steps which may include self-monitoring as determined by health officials.
- Testing members and staff for COVID-19. We are following all guidance from federal, state and local health officials on testing required for members and staff. The frequency of routine testing is determined based on the number of COVID-19 cases in the local county. Additionally, those who exhibit COVID-19 symptoms are tested to quickly identify and isolate members and staff who may be positive for COVID-19. Once there is a confirmed COVID-19 case, testing is increased to every three to seven days until testing identifies no new cases of COVID-19 infection among staff or members for a period of at least 14 days since the most recent positive result.
- Quarantining COVID-19 positive members and implementing enhanced infection control measures. We have established a designated area in the building for any COVID-19 positive members, and they are cared for and supported by designated staff. We continue to follow all infection control protocols as outlined by the CDC, CMS, and state and local health officials. COVID-19 positive members remain in quarantine until well and cleared by medical professionals, as well as meet the CDC symptom-based criteria for return to normal activity.
- Advising COVID-19 positive staff to take all appropriate measures. For the health and well-being of our care community, any staff member with a COVID-19 diagnosis is asked to quarantine at home, contact a medical provider for care, and notify their supervisor. We are following CDC guidance on the return-to-work criteria for health care professionals with confirmed COVID-19.
- Taking environmental safety precautions. Housekeeping staff continues to take extra measures to clean and disinfect all high-touch areas throughout the building. This includes countertops and tables, faucet handles, toilet flush handles, doorknobs, door handles, crash bars, bathroom and kitchen areas, elevator call buttons, and handrails.
- Adhering to safe visitation procedures. We are committed to offering visitation that supports each member's physical, mental, psychosocial well-being, and quality of life. Visitation may be conducted through different means based on the community's structure and members' needs.

**Please know the visitation options may vary based on the community's COVID-19 status. To discuss current visit options and schedule a visit with a loved one, contact Katie Plendl at 715-720-**

6775 or at [Veterans.Home-CF@dva.wi.gov](mailto:Veterans.Home-CF@dva.wi.gov). Currently as of today, closed window visits and virtual visits are available. No reservation is needed for a window visit.

*Closed Window Visits:* Closed window visits pose no risk of virus transmission.

*Virtual visits:* We encourage loved ones to communicate with members by phone, letters, video chat, and/or social media. We understand that it is hard to not have visitors, especially family. Please contact the community at 715-720-6775 for questions or assistance with these communication methods.

*Compassionate care visits:* Visitors who need to enter the community for compassionate care situations are evaluated on a case-by-case basis to assure safety for all.

*Please note the community will screen visitors for COVID-19 when they arrive for compassionate care visits.*

We are excited to see our members reunite with their loved ones, when able!

- Assuring safe congregate dining and group activities. Communal dining and congregate group activities may be offered while adhering to the core principles of COVID-19 infection prevention. This includes social distancing, face covering, and appropriate hand hygiene by members and staff.

We continue to be in close communications with our medical director, WDVA, other providers, and state and local health officials. We are also monitoring new information from the CDC, CMS, and state and local health departments to ensure we are taking the appropriate next steps.

Thank you for your support and understanding; we are all in this together. Please do not hesitate to contact Katie Plendl, Director of Admissions and Marketing at 715-720-6775 or [Veterans.Home-CF@dva.wi.gov](mailto:Veterans.Home-CF@dva.wi.gov) with any questions or concerns you may have.

Best,

Megan Corcoran
